## FRUIT CEREMONY

Pomona was, in ancient Roman mythology, the goddess of fruitful abundance and life. She is the caretaker of the forests and ensures their cultivation. Like the universal mother, Pomona cares for her creations and is a symbol of unconditional love. Without reason, her energy and impulse ensure that the gifts of nature can manifest themselves.

To commemorate this goddess, Las Maleantes present "Pomona", a multi-sensory fruit ceremony featuring performance, poetry, storytelling, and electronic music. Where we can rejoice in ecstatic experience, stimulating us with aromas, sounds, and textures.

Pomona (Adriana) interacts with the audience, sharing fruits in a playful and sensual way. Through this ritual, we create a safe space where participants can dance, feel, and connect with their own inner cultivation. An exploration of the fruits we carry and a moment of rejuvenation.

## Adriana de Montserrat

Adriana de Montserrat, is a multidisciplinary artist who focuses her work on theatre, performance and dance. Since she finished her degree in Theatre and after more than 5 years of dance training, her interest to create new contemporary performing arts languages arose. Adriana draws her inspiration mainly from nature and its community using that as starting point to create new shapes, textures, forms and universes.

## Arnau Montserrat

As a sound and new media artist, he designs soundscapes for performing arts and multimedia installations, exploring the role of sound in each of them and their possible interactions. The result of a collaboration with the artists involved, is an investigation of new multidisciplinary and transversal forms of artistic expression. The bridge he aims to create between sound and new media art allows for a deeper dialogue within the two artistic topics.
